CONTENTS

Section No.	Name of Section	Page Number
1.	Case Introduction & Problem Identification	
2.	AI Concept Analysis & Case Mapping	
3.	Proposed Solution & Working	
4.	System Representation / Architecture	
5.	Impact, Challenges & Critical Analysis	
6.	Future Enhancement & Conclusion	
7.	References (IEEE format)	

Report Guidelines:

1. Case Introduction & Problem Identification

- Real-world case
- Existing problem
- Problem statement
- Objectives

2. AI Components & Case Mapping

This is the **brainstorming section** and should be customized according to the unit.

For example, for **Intelligent Agent**:

- Agent
- Environment
- Sensors
- Actuators
- Performance measure
- PEAS
- Agent Type

For **Knowledge Representation**:

- Facts
- Rules
- Knowledge
- Representation technique
- Inference/reasoning
- Decision

For **CNN**:

- Input Data
- Feature Identification
- Kernel/Filter
- Convolution
- Feature Maps
- Activation Function
- Pooling
- Fully Connected Layer
- Output/Classification
- Suitability of CNN

3. Proposed Solution & Working

- One proposed solution
- Step-by-step working

4. System Diagram / Architecture

- Block diagram
- Input → AI processing → Output
- Students can include PEAS/knowledge-flow/model architecture as applicable

5. Impact, Challenges & Critical Analysis

- Benefits
- Limitations
- Challenges
- "What-if?" analysis
- Justification of the proposed solution

6. Future Enhancement & Conclusion

- Possible improvements
- Future extension
- Short summary of problem
- AI concept used
- Proposed solution
- Expected impact

7. References

- IEEE format
- 2–4 relevant references

Submission Guidelines (Remove this while taking printout)

- Font: Times New Roman
- Font Size: 12
- Heading Size: 14 (Bold)
- Line Spacing: 1.5
- Margin: 1 inch on all sides
- Page Numbers: Bottom Center
- Number all figures and tables.
- Provide a title for every diagram.
- Submit a properly formatted case study report.
